DAD (Digital Aided Guide for fathers-to-be) was developed in Austria. The main idea was to provide men with a customized e-Learning Service on baby care. The service implementation was so successful that we started with the European Project DAD, which aims at implementing the service to our partner countries in the Czech Republic (www.tatadoma.cz), the Netherlands (www.pappaonline.nl), Poland (www.tatusiowie.pl) and Romania (www.devintatic.ro). For demonstration purposes, you can also find an [English DAD](#).
